IFAID Aquitaine brief presentation

IFAID Aquitaine is a French non-profit organization focusing on vocational training and supporting development projects at local and international levels in both developed and developing countries. IFAID supports non-profit organizations, local authorities, community development workers and job seekers.

One of the main activities of IFAID is to implement a 2 year professional training program in project management in the field of local and international solidarity for future NGOs workers.

The reasons why IFAID is taking part in the project

IFAID is very interested in participating in the ACE project because we want to improve our knowledge and exchange with other European partners on the EU citizen's rights and include this topic in our training towards NGO workers. Thanks to this project, IFAID also wants to promote the European dimension and greater understanding of the role of the EU.
